PHONE: +92 302 5329536

Address: **Model Town, Lahore, Punjab - Pakistan**

Portfolio: alee536.github.io/Portfolio

OBJECTIVE

Software Engineering graduate bringing practical experience in creating web solutions and customizing NetSuite ERP systems. Demonstrated ability to develop functional applications while streamlining business operations through technical automation. Eager to apply programming expertise and problem-solving skills to contribute meaningfully to software development initiatives.

SKILLS & ABILITIES

Web Development:

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, Backbone.js and Responsive Design
- **Backend:** Django, Flask, RESTful APIs, SQLite, MySQL and Firebase
- **Shopify & WordPress**

NetSuite ERP:

- SuiteScript 2.x (User Event, Client Script, Suitelet, Map/Reduce)
- Custom Forms & Workflows
- Saved Searches
- Record Customization
- Sales & Invoice Automation
- Advanced HTML/PDF Templates

E-commerce & CMS

- Shopify, Theme Customization and SEO Optimization

Tools & Deployment: Git & GitHub, GitHub Pages, VS Code, API testing tools and browser developer tools.

PROJECT

Final Year Project | VisionAI | Team Lead & Full-Stack Developer

Developed an advanced web-based object detection application (VisionAI) leveraging cutting-edge AI models for real-time and image-based object recognition.

Key Features:

- Multi-mode detection: image upload, camera snapshot, and live video streaming
- Integrated YOLOv8s and YOLOv9m models with adjustable detection confidence (10%-95%)

- Real-time visual highlighting and bounding box overlay on detected objects
- Responsive UI with seamless user experience across devices
- **Technologies:** Flask, YOLOv8s/v9m, HTML5, CSS3, Bootstrap, JavaScript, Python
- **Impact:** Successfully demonstrated 92% detection accuracy with optimized model performance
- **GitHub Repo**

Ali Light Decor — Full-Stack Web Application

A complete business website for a light decoration rental service, built with Django and deployed on a live server.

- Built a complete business website for a light decoration rental service using Django (models, views, forms, admin panel)
- Responsive UI with Tailwind CSS, dark mode, hero slider, filterable gallery, and AJAX contact form with email notifications via Gmail SMTP
- Deployed on PythonAnywhere with Git/GitHub version control and production configuration

Role: Solo Developer (Full-Stack)

Tech: Python, Django, SQLite, Tailwind CSS, JavaScript, HTML/CSS, Git/GitHub

Live: Ali lights

EXPERIENCE

NETSUITE TRAINING – SUMMER INTERNSHIP

Duration: 6+ months (June 2025 - December 2025)

- Completed intensive training in NetSuite ERP customization and automation using SuiteScript 2.x
- Developed and deployed custom User Event, Client, and Suitelet scripts to automate invoice generation, lead management, and customer data processing
- Designed and customized advanced HTML/PDF templates for professional reporting, reducing manual documentation time by 50%
- Created dynamic saved searches and custom dashboards for real-time business intelligence
- Collaborated with cross-functional teams to identify workflow bottlenecks and implement technical solutions
- Optimized form automation and record manipulation across Employee, Customer, and Invoice modules

EDUCATION

BS Software Engineering (2021-25) - Islamia University of Bahawalpur

- **CGPA:** 3.09
- **Related coursework:** Web Development, Agile, Databases, AI/ML, Software Design, Cloud Computing, OOP, DSA and .Net & .Net core etc.

ICS (2019-21) - Superior College Arif Wala

- **Marks:** 70%
- **Related coursework:** Computer (C language) & DB, Math and Physics.
